

Data sheet information HACCP

Product code	Product name	Component	Material
P2068-2	Detectable safety knife MINI 	Knife body	Polypropylene based detectable plastic
		Blade	Stainless Steel
P2069-2	Detectable safety knife UNI 	Knife body	Polypropylene based detectable plastic
		Blade	Stainless Steel
P2070-2	Detectable safety knife UNI PLUS 	Knife body	Polypropylene based detectable plastic
		Blade	Stainless Steel

These types of knives is moulded in a metal detectable plastic compound and is for use in food production areas. Meet the requirement of HACCP. Recommended in BRC system.

Blue colour to enable visual detection in food. Specially designed to minimize the risk of injury.

Level of detectability depends on metal detector settings, production environment and type of produced food.

We recommend to test our metal detectable products on your own metal detector before introducing our metal detectable products to production area.

PROHACCP Company informs that our metal detectable products have magnetic characteristics and can be detected by standard metal detection systems. However due to settings of different metal detection systems, PROHACCP cannot guarantee that our products will be detected by your metal detectors. Therefore we cannot take responsibility for any non-detection of our products or their parts. Detectability of our products depends on metal detector settings, and type of food products produced (product composition, size, humidity etc). In order to make sure that our metal detectable products will be detected we strongly recommend that you test it on your metal detectors before you use it.

On behalf of PROHACCP Sp. z o.o.
