

1. PRODUCT IDENTIFICATION

Product code	Product name	Photo	Colour housing	Colour ink
P0353-	Detectable permanent marker - bullet tip		2	
P1784-	Detectable permanent marker - chisel tip		2	
PN784	Detectable permanent marker - chisel tip with serial number		2	
P0371- PL371-	Detectable white board marker MINI		2	
P0372-	Detectable white board marker - bullet tip		2	
P1788- PL788-	Detectable white board marker - chisel tip		2	
P0377-	Detectable Fineline marker		2	
P0556-	Detectable highlighter		2	
P0554-	Detectable marker/fineline TWIN		2	
P3003-	Detectable marker with food grade ink		2	brown
P3004-	Detectable marker with UV ink		2	

PL symbol - means individual printing according to customer requirements

Meets requirements of BRC (4.9.6.2)

Our markers/ highlighters are:

- designed without small parts,
- detectable by foreign body detection equipment.

2. OTHER INFORMATION

a) **Material:** Polypropylene with of the magnetic additive

b) **Used:**

Product code	Product name	Length of writing [m]	Range temp	Other information
P0353 P1784	Detectable Permanent marker	1480	From -10 to +45°C	-
P0372 P1788	Detectable Whiteboard marker	950		-
P0371	Detectable Whiteboard marker MINI			-
P0377	Detectable Fineline	1660		Recommended for use for difficult conditions (reduced temperature, greasy surfaces)
P0556	Detectable Highlighter	150	From -10 to +25°C	-
P0554	Detectable Marker/Fineline TWIN	tip fat 400 tip thin 1500	From -10 to +45°C	-
P3004	Detectable marker with ink UV			EUH208 include C.I.Basic Yellow 40
P3003	Detectable marker with food grade ink			The ingredients of this ink have been pre-registered according to EC 1333/2008

c) Storage

Store in cool and dry conditions, below 50 ° C.

d) Cleaning and maintenance

Not applicable

e) Risk

Not applicable

3. DETECTABILITY

PROHACCP Company informs that our metal detectable products have magnetic characteristics and can be detected by standard metal detection systems. However due to settings of different metal detection systems, PROHACCP cannot guarantee that our products will be detected by your metal detectors. Therefore we cannot take responsibility for any non-detection of our products or their parts. Detectability of our products depends on metal detector settings, and type of food products produced (product composition, size, humidity etc). In order to make sure that our metal detectable products will be detected we strongly recommend that you test it on your metal detectors before you use it.
